

Data sheet:

## RS232 auto switch 2 PC > 1 modem

Article no.: 85215

Unfortunately, this article is no longer available.

### 2 PCs share a modem

#### Properties

##### General information:

- 2 to 4 PCs share a modem
- Automatic switching on "first come, first served" basis
- Compatible with all data, fax and online applications
- Supports all status lines
- Reliable operation irrespective of applied modem/software combination
- As simple to use as a double plug
  - No power adapter required
  - Fully automatic operation
- Incoming calls are always routed to PC1

##### Background information:

Whether you wish to send a fax, surf the Internet or use other online services: the modem is always available for outgoing connections. Simply establish a connection from your PC by dial-up. The device automatically switches to serve your PC. Only under certain circumstances is it useful to answer incoming calls:

1. Mailbox on your PC. 2. Fax reception through the PC; this however means that you must leave your computer on 24 hours a day. 3. Data reception arranged with sender. Such incoming data is received by one PC only, as defined in the configuration.

---

### Technical data

#### Shared data:

Baud rate:	0..115,200 baud
Data format:	any format
Signals:	supports all RS232 signals
Power supply:	through the RS232 signals, no power adapter required
Current consumption:	approx. 3 mA per RS232 input
Hang-up delay:	adjustable: 20, 40, 60, 80 seconds
Housing:	Plastic housing, 124x74x21 mm
Weight:	approx. 150 g incl. cable

#### 2 PC > 1 modem, #85215

Inputs:	2 x 25-pin SUB-D adapter
Output:	9-pin SUB-D adapter

Scope of delivery: 1 x RS232 switch 2 PC > 1 modem  
1x RS232 cable for connection of the  
modems, 2m long, type 11982

**4 PC > 1 modem, #85410**

Inputs: 4 x 25-pin SUB-D adapter

Output: 9-pin SUB-D adapter

Scope of delivery: 1 x RS232 switch 4 PC > 1 modem  
1x RS232 cable for connection of the  
modems, 2m long, type 11982
