Store measurement values on a database server

Sensobase® is the free tool for gathering measurement data vom W&T Web-Thermometers and Web-IO Analog-IN devices and forwarding them to a database server. Sensobase® uses ODBC clients for the various server systems. This means the system can be linked to any database that comes with an ODBC driver for Microsoft Windows.

Properties

Function Overview:

- Automatic generation of an inventory list of the Web-Thermometers and Web-IO Analog-In devices available in the local network
- Display of database statistics which represents the number of valid and collected values
- Saving of the data at freely configurable minute intervals (minimum 5 seconds)
- Export of data series from a device into an Excel spreadsheet
- Export of a summary of individual device data into an Excel spreadsheet
- Use of ODBC clients for the respective database, making it system-neutral

System requirements:

- Operating system NT 4.0/2000/XP/Vista/2008/7/8/8.1/10/11
- Network card (Ethernet)
- Installed TCP/IP stack
- ODBC driver for your database
