Accelerate your printer

### Properties

#### General information

- Fast temporary storage of parallel data
- Reduces the load on the computer during printing
- No installation procedure required
  - Simply connect between the computer and the printer, instead of the printer cable
- Compact design

#### Background information:

This simple buffer technology is still preferred for printouts on dot-matrix printers and other relatively slow special printers that are commonly used in industrial enterprises.

---

### Technical data

Capacity:	64 KB, 256 KB, 1 MB
Transfer rate:	15 kcps
Power supply:	supplied power adapter
Current consumption:	approx. 60 mA
Input:	36-pin Centronics socket incl. 0.5m cable attached to the device
Output:	36-pin Centronics adapter, buffer Can be plugged directly to the printer
Housing:	Plastic housing, 75x61x20 mm
Weight:	370 g incl. power adapter
Scope of delivery:	1x Centronics buffer 1x power adapter for application in office
