Data sheet:

IEEE488 > Centronics interface

Article no.: 32000

Unfortunately, this article is no longer available.

Connection of Centronics printers to IEEE488/GPIB interface

Properties

General information

- No special printers for measuring devices needed.
- Simple installation
  - Configuration of address or
  - list-only mode available

Background information:

Printers with Centronics interfaces are very popular and thus are available cheaply. With external interfaces, they can be adjusted to suit any port. The interface normally outlives several printer generations.

Technical data

	IEEE488 > Centronics interface, #32000
Primary address:	1.. 7 and list-only
Secondary address:	0.. 2
Components:	AH1, L1
Code conversion:	Commodore > GRASCII selectable by means of DIL switch or secondary address:
Power supply:	supplied power adapter
Current consumption:	approx. 100 mA
Input:	24-pin Amphenol connector incl. 2m cable attached to the device
Output:	36-pin Centronics plug, interface Can be plugged directly to the printer
Housing:	Plastic housing, 75x61x20 mm
Weight:	390 g incl. power adapter
Scope of delivery:	1x HPIB > Centronics interface 1x power adapter for application in office

	Commodore > Centronics interface, #92000
Primary address:	4, 5
Secondary address:	0, 1, 2, 3 and 7
Operating modes:	Cursor-up/cursor-down mode Upper/lower casing, transparent mode
Power supply:	Supplied cassette port cable
Current consumption:	approx. 60 mA

Input:	5-pin DIN plug incl. 2m cable attached to the device
Output:	36-pin Centronics plug, interface Can be plugged directly to the printer
Housing:	Plastic housing, 75x61x20 mm
Weight	190 g
Scope of delivery:	1x Commodore > Centronics interface 1x cassette port cable
