Web and application server for top-hat rail mount

The pure.box is a small computer you can operate directly in the field. Setup is quick and easy using a user-friendly Web interface. The rugged application server based on ARM Linux reliably runs your applications.

- **Uncomplicated setup**
Thanks to the Web-based configuration you are ready to run your applications in just a few minutes using an ARM Linux system.
- **Platforms and programming languages**
Web applications with integrated Web and database server, cross-compiled applications in C/C++ and Go or script-based with PHP.
- **Various data interfaces**
In addition to the network interface, the boxes are equipped with serial ports and USB.

Compact web server for your application

#50525
