

Application for the Web Thermometer:

Climate Digital

Measure and store temperature and relative humidity and display in the browser. Anywhere, anytime.

- **Measuring device**
Temperature: -40°C .. 85°C
Relative humidity: 0 .. 100% rF
- **Manipulation-proof data storage**
Integrated flash memory:
Memory depth min. 10 weeks, max. 12 years
- **Communications central**
Supports common Web standards:
HTTP, e-mail, SNMP, TCP/IP, UDP, OPC, ...
- **Visualization**
Direct display of the stored measurements
as a graph or climatogram

Connect, assign IP address, go!

Application examples:

- Monitoring temperature- and humidity-sensitive goods in a warehouse
- Refrigerated building and refrigerator monitoring
- Server room monitoring
- Monitoring rooms to determine efficiency and control air conditioning systems
- Data safe for required proof of registration
- ...
