

Application for the IP-Watcher

Monitor alarm states in the browser and acknowledge alarms

To product

Application overview

Conveniently monitor your configured alarms in the browser. The self-refreshing display means you always see the current alarm status. Clearable alarms can be acknowledged by clicking in the browser.

 <p>Once the IP-Watcher has been configured for your network and connected, the following steps are necessary:</p>	
<p>Enter the IP address of the device in the address line of your browser.</p> <p>This takes you to the start page where the status of all the configured alarms is clearly shown.</p> <p>Updating is cyclical, once every second.</p>	<p>1: </p> <p>2: </p>
<p>To acknowledge clearable alarms, administrator or operator rights are required. Log in using the dialog box in the upper right corner of the window.</p> <p>The corresponding buttons for sensing an acknowledgement are shown after you have successfully logged in.</p> <p>Done!</p>	<p>1: </p> <p>2: </p>
