# WuTility - Management and Inventorying Tool

Active search for Web-IO products and Com-Servers in the local subnet and display of all relevant information at a single glance. Quick assignment of network-side basic parameters, copying of whole configuration blocks, uploading of firmware updates and direct Telnet access are just some of the additional functions.

Date	Changes and comments	Revisions
March 19, 2021	<ul style="list-style-type: none"> <li>IP addresses visible in the dialog for the inventorying method</li> <li>Error with firmware assistant fixed</li> <li>Installation packet no longer includes PuttyTel</li> </ul>	4.71 <a href="#">EXE download</a> (approx. 5.2 MB)
